<sup>a</sup> Includes utility-scale solar thermal and photovoltaic (PV). Excludes small-scale solar.

<sup>b</sup> Includes chemicals, hydrogen, pitch, purchased steam, sulfur, miscellaneous technologies, flywheels, and non-renewable waste (municipal solid waste from non-biogenic sources, and tire-derived fuels), which are not separately shown.

— = No data reported.

Where shown, (s) = value less than 0.5.

Notes: Data are for utility-scale facilities (>1 megawatt capacity) in all sectors including electric utilities, independent power producers, commercial plants, and industrial plants at the end of year. For plants that use multiple sources of energy, capacity is assigned to the energy source reported as the predominant one.

Data Source: U.S. Energy Information Administration, State Energy Data System. See Technical Notes. <http://www.eia.gov/state/seds/>
